maiConnect for S/4HANA® Admin Guides

Maintain Exchange Environment

Maintain Exchange environment

Open AdminCockpit Exchange Customization

The screenshot shows the AdminCockpit interface for CAMaiConnectDevS4. The left sidebar contains a navigation menu with the following items: Admin (1), User / Subscription, General Customizing, Activity Customizing, White- / Blacklisting, and Suspend / Resume. The main content area is titled 'Admin' and shows a 'Groupware' section with an '+ Add' button (2). Below this is an 'Exchange' section with a right arrow, a close button (3), and a refresh icon.

- ① Open the maiConnect AdminCockpit and click on the Admin menu item.
- ② By clicking on the add button you can add a new Exchange server configuration.
- ③ By clicking on the remove button you can remove an existing Exchange server configuration.

Maintain Exchange environment

Add a new Exchange server configuration

Groupware

Name: Exchange **4**

Type: EXCHANGE

Version: Exchange2010_SP2

*URL:

*Authentication: Basic **5**

Use Impersonation:

*User:

*Password: *****

4 Every Exchange server configuration needs to have a unique name.

5 Choose between Basic authentication for an Exchange onPrem system or OAuth for Exchange Online (Office 365)

Groupware

Name: O365 **4**

Type: EXCHANGE

Version: Exchange2010_SP2

*URL:

*Authentication: OAuth **5**

*oAuth Type: App Authentication

*Client ID:

*Token Url:

Maintain Exchange environment

Basic Authentication

Groupware

Name: Exchange

Type: EXCHANGE

Version: Exchange2010_SP2

*URL: 6

*Authentication: Basic

Use Impersonation:

*User: 7

*Password: *****

- i Basic authentication is used when connecting to an Exchange onPrem server.
- i Impersonation gives the maiConnect communication user the possibility to act as the real Outlook user.

-
- 6 This must be the externally reachable URL of the Exchange server.
 - 7 Please maintain the credentials of the maiConnect communication user.

Maintain Exchange environment

OAuth Authentication

Groupware

Name:

Type:

Version:

*URL: 8

*Authentication:

*oAuth Type:

*Client ID: 9

*Token Url:

i OAuth authentication is the only way to connect to an Office 365 Exchange server

8 The URL for O365 Exchange is always:
<https://outlook.office365.com/EWS/Exchange.asmx>

9 Please maintain the client id and the token URL from the Microsoft Azure setup.
See the Deployment Guide on how to setup the application in Microsoft Azure.
